

OVCEA

Introduces

For the Whole Family!

WorldView Lecture Series

Subjects:

The Real World of Entomology (insects)— it bugs evolution!
The Real World of Mt. St. Helens— it's bad news for uniformitarianism!
The Real World of Creation—Evolution and the Classroom— it bothers evolutionists!

Saturday April 29

10:00 AM Community Room

Washington State Community College

WHO

Speakers:

Mr. Karl Priest

Amateur entomologist and mathematics teacher in South Charelston WV member of KCSG Kanawha Creation Science Group

Mr. Robert Rhodes

Retired geologist and petroleum land specialist resides near Ripley WV member of KCSG, Kanawha Creation Science Group

Session 1 10:00 AM

WHAT

Mr. Karl Priest will discuss: **Entomology** — The world of insects. His fascinating presentation, displays, and incredible facts about these unique creatures will provide overwhelming testimony to their supernatural design and complexity in contrast to evolutionary suppositions of chance and mutation-based explanations about how this segment of the animal kingdom came to be.

Session 2 11:45 AM

Mr. Bob Rhodes: Will present a breathtaking slide show and evaluation of recent events at **Mt. St. Helens**. Ongoing study of this spectacular event and it's aftermath is yielding some very enlightening geological and earth science insights that are very fascinating for creationists and very troubling for those of the uniformitarian view of geology.

Session 3 2:00 PM

Karl Priest will overview recent **classroom**—school board creation-evolution controversies in Charleston WV that have been ongoing in recent months.

WHERE

WSSC is located in Marietta OH, on Colegate Dr. . Park in the entrance level parking— enter at the main lobby — Community Room is first classroom to the right, next to stairs. If parking on upper level — take stairs down one level to Community Room

MEETING AGENDA

We will begin the session at 10:00 am —
Refreshments and Snacks will be provided —
We will break for lunch at 1 PM — on your own for lunch—
Return for a final session at 2:00 PM — 3:00 PM Close
Optional Q&A

The **OVCEA WorldView Lecture Series** is an ongoing series of area meetings open and free to the public to voice the creationist world view and encourage parents, students, pastors, and teachers to be better acquainted with the issues, rationale, and evidences involved in the creation / evolution controversy —

The ongoing 75+ years of government and major media sponsored one sided education on the issues and arguments in origins has permeated the previous and current generations and culture with false conclusions based not on empirical scientific method, but rather sprung from a godless naturalistic philosophy —mounted largely on disproved or at best credulous extrapolations of scientific data. OVCEA seeks to expose and counter the weaknesses and falsities of the current evolutionary views and make the case for creation — a case more in harmony with the evidence and with what is revealed in the Scripture. **WorldView Lecture Series** will invite speakers from a variety of disciplines and backgrounds to bring their information and expertise to bear on the issues. Believers, seekers and skeptics alike are invited to attend.
